Forward looking information and statements relate to future events or future performance and reflect current expectations or beliefs regarding future events and are typically identified by words such as “anticipate”, “could”, “should”, “expect”, “seek”, “may”, “intend”, “likely”, “plan”, “budget”, “objective”, “estimate”, “will”, “believe” and similar expressions suggesting future outcomes or statements regarding an outlook. These forward-looking statements relate to, among other things, the outcome of the discussions being held with the Government of Mongolia on the development and financing of the Oyu Tolgoi project and all related issues.

All such forward-looking information and statements are based on certain assumptions and analyses made by issuer’s management in light of their experience and perception of historical trends, current conditions and expected future developments, as well as other factors management believes are appropriate in the circumstances. These statements, however, are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking information or statements. Important factors that could cause actual results to differ from these forward-looking statements include those described under the heading “Risk Factors” included in the issuer’s Annual Information Form, both filed on SEDAR and EDGAR. These risk factors may be generally stated as the risk that the assumptions and estimates expressed above do not occur, including the assumption in many forward-looking information or statements that other such information or statements will be correct. The reader is cautioned not to place undue reliance on forward-looking information or statements.
